Design Factors and Categories for University of California, Riverside

The following design factors are utilized for projects on the UC Riverside Campus:

- **Campus Elevation:** (Range) Varies from 970’ to 1,400’
- **Wind:** 110 MPH (usually exposure C)
- **Rain:** 2 inches per hour
- **Seismic:** Seismic Design Category "D_2"
- **Snow load:** None
- **Special roof loads:** None beyond the loads specified in Chapter 23 of the CBC
- **Climate Zone:** Zone 10
- **Soil Types:** Vary, check with your geotechnical engineer or soils report.
